

Waseem NASEEVEN

DEVSECOPS - SITE RELIABILITY ENGINEER

DevSecOps / SRE – AWS helping companies design, secure, and operate reliable cloud platforms. I build production-grade systems with Infrastructure as Code, CI/CD automation, and strong observability, with a security-first approach. I deliver scalable, cost-efficient, and resilient infrastructures from design to incident-ready operations.

EXPERIENCES

BACKEND DEV - DEVSECOPS

KasarLabs - Starknet, Jun 2025 - Dec 2025

- Deployment of Snak, a platform for AI agents on the Starknet blockchain, enabling interactive AI capabilities for dApps with MCP.
- AWS account creation and cost-efficient management of a production-ready full-stack cloud infrastructure (EC2, Fargate, IAM)
- Fully automated deployment of HA databases, APIs, authentication, secrets engine, monitoring using Terraform, Ansible.
- MCP registry local, dev in Golang.

BACKEND - DEVOPS ENGINEER

Viginum - Prime Minister Service, Feb 2025 - Aug 2025

- Deep knowledges of Golang
- Deep knowledges of PKI engine and secrets managements (Hashicorp Vault)
- Design, fully automated deployment of a redundant, HA and secure mTLS metrics/logs monitoring stack (Exporters, Prometheus, Grafana, Alertmanager, Thanos, S3 standard, ELK, Fluentbit, Rsyslog...) with OpenTofu and Ansible
- Hybrid orchestration on-premise using Outscale (Linux), k8s, Docker

LAST PROJECTS

ARBITRAGE BOT

- Still working on developing a crypto arbitrage trading bot in Go with exchange API integration and performance optimization.

X509-WATCH

- Custom OpenMetrics exporter reporting x509 certificates expiry and validity, written in Go

KERNEL IN RUST

- Implementing low-level components such as the GDT, stack, interrupts, memory management.

FORMATION

42 | NOV 2022 -

RNCP 7 Expert in computer science
Network and System

AWS Cloud Practionner CLF-02

PARIS SACLAY | SEPT 2016 -
MAY 2021

MASTER Degree in IT Law / Lawyer
Exam
Thesis: Legal Framework of the
Blockchain

TECHNICAL KNOWLEDGES

- Languages: Golang, Rust, Node.js
- Cloud & Orchestration: AWS, Outscale, Docker, Kubernetes (k3s, k3d)
- Infrastructure as Code: Terraform / OpenTofu, Ansible, Helm
- CI/CD & GitOps: GitHub Actions, ArgoCD
- Security & Secrets Management: HashiCorp Vault (PKI, KV), Traefik, HAProxy, Keepalived OAuth2 Proxy, mTLS...
- Monitoring & Logging: Prometheus, Grafana, Alertmanager, Thanos, ELK/EFK...
- Databases: PostgreSQL (pgvector), Redis
- Blockchain: Starknet

LANGUAGES

- French Native
- Creole Mauritius Island Native
- English

HOBBIES

- Chess
- Music (Musician, Production)
- Scuba-Diving, Surf
